"...even quadrupling the standard military ration was unable to satisfy his large appetite. He ate any available food from gutters and rubbish heaps but his condition still deteriorated through hunger."

"...experiments to test his eating capacity, in which, among other things, he ate a meal intended for 15 people in a single sitting, ate live cats, snakes, lizards, and puppies, and swallowed eels whole without chewing. Despite his unusual diet, he was underweight and, except for his eating habits, he showed no signs of mental illness other than what was described as an apathetic temperament."

BABE PLEASE

"He was granted quadruple rations but remained hungry; he scavenged for garbage in gutters and trash containers, ate the scraps of food left by other patients, and crept into the apothecary's room to eat the poultices. Military surgeons could not understand his appetite."

"...he agreed to submit to any procedure that might cure his appetite. The procedures failed, and doctors could not keep him on a controlled diet; he snuck out of the hospital to scavenge for offal in gutters, rubbish heaps and outside butchers' shops, and attempted to drink the blood of other patients in the hospital while they were bloodletting and to eat the corpses in the hospital's morgue."
